ABOUT US

At FLY E-BIKE, we continue to believe that we have a key role to play in encouraging people to add eco-friendly transportation to their active lifestyles. This vigorous paced start-up was established in 2018 and is currently based in New York City. Most of our manufacturing is handled by our factories located in China and assembled here in the United States. Our niche market is predominantly food delivery workers who need to get around the city without any delays.

We currently have over forty physical store locations around the world. Most are located in the tri-state areas, but we also have stores located in South America and soon to be in Europe as well. FLY E-BIKE is taking over the electric transportation market, so come fly with us today!
